

INTERSTATE'S SHREDDER-BEDDER

A new era in the production of cotton . . .

This one-pass minimum tillage machine shreds stalks and roots, tills the soil in the growing area and reshapes the old beds all in a single operation. It is ideal for use in every soil type; from sandy and light through medium to heavy. Efficient minimum tillage systems are the key to higher productivity. **INTERSTATE'S SHREDDER-BEDDER** saves money, time and energy and helps to build up the topsoil to prevent erosion. This is your best investment now and for the future — a total tillage machine for the production of cotton.
